DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, 44 and 45, drawn to programming functionality, classified in class 345, subclass 762.
- II. Claims 36-43, drawn to an on screen link communication, classified in class 345, subclass 805.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility such as encapsulating different aspects of the graphical user interfaces in multiple objects. However, invention II has a utility of limiting the interactions between objects.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Anthony Castorina on 04/05/2004 to request an oral election to the above restriction requirement, but did not result in an election being

made. A telephone message was left for Mr. Castorina in regards to the restriction; however the examiner did not receive a response in regards to the message.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
